

SafeTrader

Pty Ltd

A Wealth of Knowledge

**It really is possible
to trade or invest
in shares successfully
and safely!**

welcome

My name is Mark Van Oirschot. I am the creator of Safe Trader Pty Ltd and the person responsible for inviting you to this educational seminar. I sincerely thank you for attending. I don't say this casually because I know it can be difficult to find the time to attend such an event. In return, the least I can do is to make your trip worthwhile.

Safe Trader

Safe Trader is committed to helping you help yourself. The share market can be a profitable asset class and offers you, if you are willing to learn, the opportunity to create your own successful business or lifestyle. When you learn the knowledge Safe Trader has to offer, you will have it for life. Investing a little time in yourself to gain this knowledge will give you the capacity to improve your life forever.

- If you require income, you will learn how to trade safely and apply your knowledge to generate cash flow.
- Perhaps your objective is to build medium or long term wealth? Did you know that 25% per annum compounded on \$5,000 amounts to \$1,323,488.98 in 25 years time, without adding any additional savings! If you think this is astounding you are right! And the really interesting part is \$889,808.11 of this wealth is accumulated during the last 5 years. This is the power of compounding consistent profits.

trade or invest in shares successfully

It also evolved from many late nights studying the works of arguably two of the most successful traders of all time – William D. Gann and Jesse L. Livermore. By the mid 1900's W.D Gann made over \$50 million solely through trading (an estimated \$500 million in today's terms) while J.L Livermore profited over \$3 million in 1907 and \$100 million during the crash of 1929 more than \$1 billion dollars today. Good luck in trying to equal the accomplishments of the two super traders, but think about this: If you could achieve **even half of one percent** of what Gann or Livermore was able to achieve, well, then 25% per annum may not be too far from the truth.

Trust yourself, believe in your own abilities, correctly apply the right knowledge and you will achieve. If you think you can – you will!

Let your objective be to trade safely and successfully.

I have nothing to hide. I will tell you the facts about risk and how you can apply a set of rules to minimise losses and maximise profits. The key secret to building real wealth or deriving a magnificent income via the share market is to become a disciplined, Safe Trader and focus on the big moves of a strong trend.

wealth 3

SAFE investment

How does one trade safely and become successful?

- Rule 1** Trade in the same direction as the major trend and learn how to test strength. (The quarterly chart is the most valuable indicator you will ever use.)
- Rule 2** Trade the minor trend but only in the same direction as the major trend. (Like a dancer, a stock will bow before leaping into the air.)
- Rule 3** Never overtrade. Start with small money and divide your capital evenly into at least quarters. (Prove to yourself you can make profits before increasing your capital.)
- Rule 4** Always use a Stop Loss. Your maximum allowable risk on any one stock is 10% of your divided capital. (If you're against the trend get out immediately to minimise losses.)
- Rule 5** Let your profits run but know when its time to sell. (Most people either sell too quickly or hold on too long. Safe Trader can teach you how to hold your position and reap the fruits of your labour.)
- Rule 6** Tailor your own trading plan. (A good trading plan should be simple and summarised so at all times your actions are based on facts, not guesswork. The share price is reality, not the opinion of others.)

Rule 7 Your trading should not interfere with your day to day lifestyle. (These days technology allows you to set 'price alerts' to your mobile phone. Initially you will need to make some small sacrifices for knowledge, but then, during the daytime if you are in a trade - forget it.)

Rule 8 Know how much you need to make. (Long term successful trading relies on your ability to generate profits in excess of inevitable losses. You must make at least \$2.50 profit for every \$1.00 you are prepared to lose. This way you can be wrong 7 times out of ten and still come out ahead.)

Rule 9 There is no such thing as a bad trade, only poor technique. (Don't get caught up in losses, there is always the next trade. If you have followed your rules and you fail to produce a profit, at least the loss is controlled and you have cut further possible losses. Remember, there is always the next trade.)

Rule 10 Maintain a sense of humour. (Laughter will save us all.)

wealth

How can Safe Trader help you?

Through blood sweat and tears, years of study, research, and hundreds of hours spent deciphering the techniques of W.D. Gann, you have in front of you Safe Trader - complete, easy to understand, proven course designed with your safety in mind. Markets move to a rhythm and while people control the buying and the selling, history will continue to repeat, just like W.D. Gann said it would. I am convinced all individual stocks and other securities can be traded profitably using the methods taught in this course. This is because the rules continue to work over and over again, allowing you to derive consistent profits.

For many years now, I have tested and refined these rules over various securities. I have consistently traded Australian stocks for profit, and will continue to do so. There is a definite mathematical relationship between distinct tops and bottoms. The most important level above, below and between these points is 50%. Gann

said you can make a fortune using this one rule alone. If you choose to undertake this course, we will work on this rule and I will show you how to use it effectively to further improve your trading.

My mission is for you to prove to yourself that consistent profits can be generated to produce real wealth over time without exposing yourself to high levels of risk. You don't need vast amounts of capital or leverage (such as debt), to become financially independent. You do however need the right knowledge, a little guidance and a solid belief that you can achieve your goals.

If you have the will and discipline, I can give you the knowledge. Between us, you can then focus on developing your technique without the pressure and stress of encumbrance. In no time at all you will be trading within your emotional limits and well on the way to improving your life forever.

What's in it for you?

210 page hardcover manual with over 50 diagrams

A great deal of effort and time has gone into this manual to make it easy for you to understand.

Superbly presented, it contains all the knowledge you require to trade like a professional. It

assumes you have no knowledge of the market and takes you on a journey that is challenging, fun and rewarding. By the time you have finished you will have a trading plan tailored specifically for you.

A1 Full Colour Wall Chart of News Corporation

This is your 'Cheat Chart' to refer to always.

It takes a look at a quarterly chart or the

major trend of News Corp over 12 years. It proves the rules continue to work and spells out the importance of higher or lower quarterly bars.

All the rules are summarised and shows you where you could have traded 3 bar swing setups for big profits. We will examine this chart during the trading conference. In my opinion, the knowledge this chart can give you is priceless.

The Safe Trader Program

This little beauty will take most of the tedious work out of trading. Once you learn the rules, you simply enter the name of your stock, amount of capital you intend to trade, enter the 4 distinct

top and bottom price values of a setup and the Safe Trader program will do the rest. Press print and all is revealed. Click on the price alerts button and you will automatically be connected to Australia's most popular internet broker. (Cheap brokerage fees, mobile phone price alerts and free company research is all here.)

The program automatically records your trading transactions allowing you to print for accounting purposes, saving you valuable effort and money at tax time.

The Safe Charter Program

Safe Charter is an excellent swing charting software package. It is a powerful program but easy to use. Designed to automatically download daily stock, futures or option prices at the click of a

button, saving you precious time, Safe Charter will make your charting a breeze. What would normally take you hours can now be done in minutes.

10 Years of Data History

The future is merely a repetition of the past. It is important to observe old tops and bottoms because there is a relationship above, below and between these points.

If you are going to minimise losses and maximise consistent profits then accept the need for accurate historic charts. Without them you have only luck by your side, and eventually luck runs out.

Reminiscences of a Stock Operator Author: Edwin Lefevre

This would have to be my favourite book. Every time I read it something good happens. I encourage you to read it too, and if you already have, then I suggest reading it again and again. Your thought patterns are the cause of every decision you make. With every decision comes action. It is this action that implements reality. So to make any necessary changes or adjustments to your life, and you will benefit greatly by returning to the basics of thought.

Other equipment

You are also provided with 3 - A1 sized sheets of charting paper. I encourage you to hand draw the exercises I have set, so that you can familiarise yourself fully with the 3 bar swing chart. Included are 2 permanent charting pens, your own writing pen, and a ruler.

reward

12 full months of before midnight daily data downloads

Every night after 5 pm, during a normal working week, simply click a button and you will automatically download your data for any and every stock listed on the Australian stock exchange. Within minutes Hot trader automatically updates all charts. After your first 12 months, as a Safe Trader client you will also receive excellent discounts from our data provider, Paritech.

2 full day trading conference

At 8am, you arrive at a deluxe venue in the most convenient location possible, where you will enjoy a full corporate breakfast. At 9am you will attend a class with other people – who like you, are eager to learn. After a morning of fun and learning, a buffet lunch is provided. Conference sessions will then continue until 5.00pm. The following day will begin at 8am in the classroom where we will apply the rules to real trades, cover the use of the software and prepare your trading plan. The weekend will conclude at 5pm on the Sunday.

Reward

I am big on self rewards, and there is one awaiting you inside the Safe Trader kit for making the decision to commit to a little study. If you give yourself a chance and learn to follow the rules I can teach you, then a reward greater than you could ever hope for awaits you.

It has taken me years to master the knowledge inside this course. For you, it is on a silver platter. By no means am I saying that trading is easy, because in your early days, it's not. There are obstacles to overcome - obstacles of knowledge and overcoming your own emotions. But if you are prepared to invest just 20 or 30 minutes a day into yourself, you can make this course work and improve your lifestyle. Consistent profits mean freedom. I have seen people produce results beyond their wildest dreams, and you can too. Go on, unlock your potential, and make it work!

To make your Safe Trader journey pleasant, every effort has been taken to ensure you receive nothing but the very best I can give you. Other than 'yourself' there is no reason why you cannot enjoy the learning process and then become a Safe Trader.

For me, the greatest reward of all will be – "To see you succeed!"

Sincerely

Mark Van Oirschot
